

Smart & Safe

You take care of your family and home

we give you the **solution** that will make you feel there **safe** and **comfortable**.

BE WAVE is a family of unique wireless devices with which you will introduce smart solutions into your daily life and implement home security.

BE WAVE surprises not only with its wide range of possibilities, but also with its simplicity of installation and operation.

BE WAVE is an **ALL-IN-ONE** system

Implementation of home automation functions

Protection against intruders not only inside the house but also in the area around it

Analysis of readings of and response to changes in air temperature, pressure and humidity

Detection of and response to flooding, carbon monoxide leakage and first signs of fire

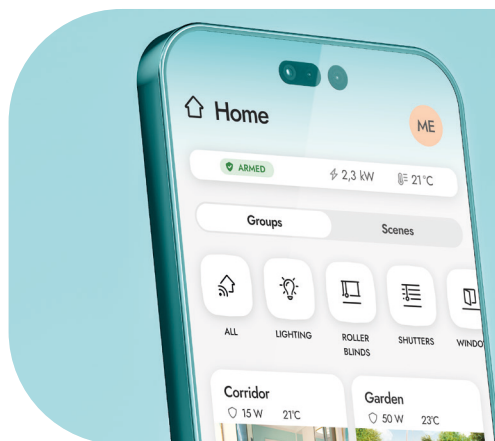

Have a look at how simple it is

3, 2, 1... GO

quick system start in the application

A few clicks is all it takes to create your home in the app. In the next step, you will add devices, name them, assign them to rooms and select the functions they are to perform in the system.

Your BE WAVE
is ready for action sooner than you think!

What drives BE WAVE?

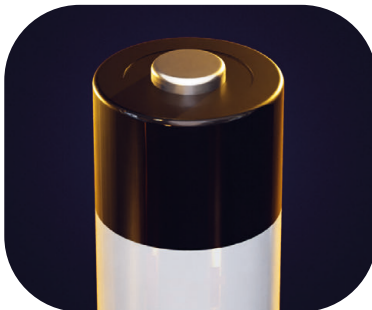

All the devices found in this family employ the well-proven **ABAX 2** wireless technology

Highly rated by professionals

For years, it has been highly rated by professionals all over the world due to the security of communication, the long ranges of operation and the functionality offered.

Hundreds of thousands of systems using **ABAX 2** technology have been installed in over **50 countries**

Long operation on battery

The advanced energy-saving features of the **ABAX 2** enable **BE WAVE** devices to operate for long periods of time without interruption — even up to a few years.

When the battery is about to run out, the system will notify you well in advance. Importantly, the batteries powering the **BE WAVE** devices are widely available.

Installation – stick it on and it's done

BE WAVE devices can be fixed to the mounting surface using a special mounting tape, which makes assembly and disassembly quick and clean.

Remote control of your home

Stay in control wherever you are. With the **BE WAVE** app, you have your home under control at all times. You can quickly and conveniently check the status of the system, activate or deactivate protection, control connected appliances, and monitor the heating.

Automation for everyone

With **BE WAVE**, the automation world is open to you. Our in-house solution for creating dependencies between home installations in the app is simple and intuitive even for those without advanced engineering knowledge.

You turn on your **scenes** when you need them, regardless of the time of day or night.

Routines will start automatically, according to a schedule you set, or triggered by other devices and events in the system.

Energy-efficiency –

lower bills and life style **ECO**

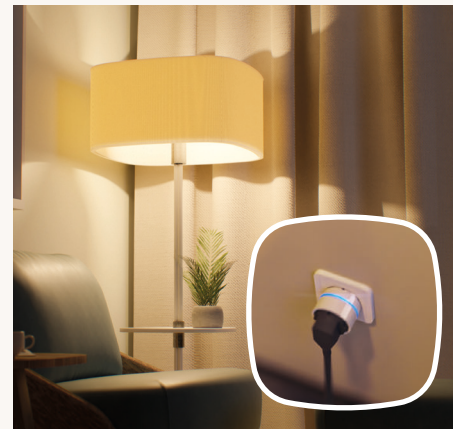

Installations such as:

heating or **lighting** systems as well as all other appliances using electricity are **cost generators**.

Develop your own scenes and routines to **automatically manage power consumption** in a manner that is both optimal and ensures comfort for home dwellers.

Take care of your household budget and the planet

Example scene: "Leaving the home"

1. Closing the windows
2. Closing the blinds
3. Switching off all lights
4. Cutting off power supply to appliances that don't need to be in the stand-by mode while you are away
5. Switching the heating to the **ECO** mode
6. Activating the protection
7. Activating presence simulation

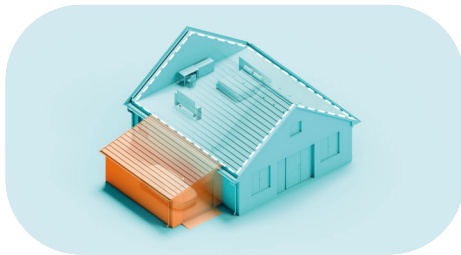

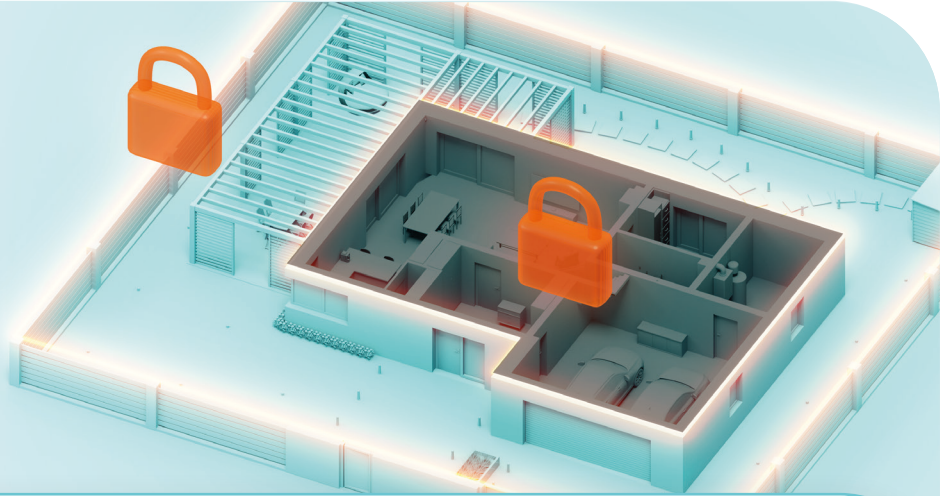

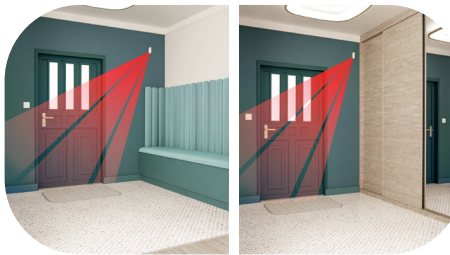

Full protection for your home and property

In **BE WAVE** you can create up to
8 protection modes. Night, day, full...
It's your choice!

With **BE WAVE** you will provide effective protection against intruders not only inside your house, but also around it.

A converted **loft**, a **garage extension** or perhaps simply a wish for new functionality in an already existing system?

Or maybe you are changing the interior decor and now the **new wardrobe** has covered the motion detector?

Maybe you are moving house and want to take your **BE WAVE** system with you?

No problem at all! With **BE WAVE**, you can **quickly and without hassle expand the system** and add more devices to add smart solutions or protect more rooms. As the devices are installed with mounting tape, it is easy to change their location at any time.

WHO has developed BE WAVE for you?

BE WAVE is a family of products expanding the **SATEL's** portfolio. We are a polish manufacturer that for more than **30 years** has specialised in developing some of the most popular devices in the electronic security market around the world.

Our Team looks to the future and keeps improving the equipment. Professionals representing a wide variety of disciplines, technology enthusiasts with a wealth of theoretical knowledge and many years of practical experience, work every day to ensure that the system in your home offers the top level automation capabilities and protection coverage.

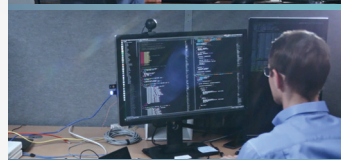

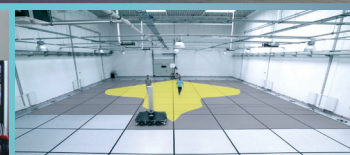

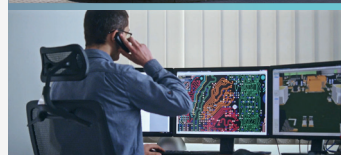

Confirmed quality

Our equipment is verified by independent certification bodies in a series of highly sophisticated tests that take into account compliance with the entire catalogue of industry standards.

This ensures that we deliver a **high-quality product into your hands.**
